

87000AVAG Antifreeze Premium Longlife G13

Concentrate

Document version: November 29th 2017

Description

This Premium Long Life (lobrid technology) is a Silicate-containing antifreeze based on Organic Additive Technology (OAT) which meets the latest requirements of the VAG group VW TL 774J to be used in VAG models from June 2011. This Premium Long Life antifreeze G13 should be diluted with the recommended quantity of water before use. This antifreeze is fully backwards compatible with the previous G12++ generation with the exception of heavy duty truck engines.

Please note: Due the fact that the product contains glycerol the readings via a regular refractometer on the MEG scale will lead to a wrong conclusion regarding the right freeze point. See typical characteristics.
